

#neutraldensity 10 Stops without color shift

Description

TrueMatch Vari-ND® filters enable a stepless density setting from 1-1/3 stop to 10 stops. They are made of two stacked, carefully color-matched pol filters, which are combined in a single low-profile cell. The low profile prevents vignetting on most camera lenses.

Application

The perfect choice for cameras with high ISO settings. Independent exposure control allows the user to select the lens f/stop and camera speed independent from ambient light conditions.

Key Features

- No color shift
- 10 stops attenuation of light control
- Smooth rotating rings
- Clear setting marks to choose strengths

Sizes

M77, M82
+ M95 (by B+W)

Filter Range

Stock Code	Filter Type + Stop	Range	Hard-stops	Size	Weight (g)
1105442	CF True-Match Vari-ND® MKII	10 Stops	No	M77	81.6
