

#diffusionfilter

Softens the image, but maintains overall sharpness

Description

Hundreds of Micro-Lenslets™ arrayed within each Schneider Classic Soft® filter provide a precisely controlled softness overlaid on a sharp, in-focus image. The number and dedicated size of Micro-Lenslets per square inch determine the softness applied to the image.

Application

Depending on the strengths, Classic Soft® adds mood to the shot by causing highlights like a lit candle or even a blown window to softly glow. It produces a romantic look to the image. The filters work with refraction of light instead of diffusion. Shadows are almost untouched, blacks stay black.

Key Features

- Blend small wrinkles and blemishes
- Maintains focus, adds a soft overlay
- Keeps contrast
- Adds soft glow to highlights
